LEAD SERVICE LINE REPLACEMENT

SCENARIOS

On January 1st, 2022, the Illinois Lead Service Line Replacement and Notification Act (Public Act 102-0613) went into effect. The Act outlines requirements for different scenarios in which LSLR may occur. These scenarios include Emergency Repair, Planned Watermain Replacement, Customer-Initiated LSLR, and Federally or IEPA Funded LSLR. The requirements for these scenarios are represented in the following exhibits.

WATER SERVICE LINE

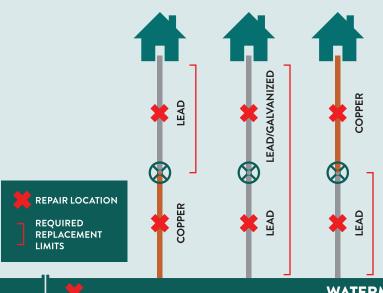

(As defined by the Illinois Lead Service Line Replacement and Notification Act)

SERVICE LINE: FROM THE WATERMAIN TO FIRST BUILDING SHUT-OFF VALVE OR 18" INSIDE THE BUILDING, WHICHEVER IS SHORTER.

WATERMAIN

SCENARIO 1: EMERGENCY REPAIR

STEPS:

- 1. CWS contacts the building owner to initiate full replacement of lead.
 - If building owner refuses full LSLR, they sign IDPH waiver and CWS notifies IDPH of refusal and remaining lead. Providing filters becomes the building owner's responsibility.
- 2. Complete the repair.
 - If partial lead line remains:
 - 1. Notify owner and resident(s) of the repair and remaining lead.
 - 2. Provide filters for one fixture until remaining lead is removed.
 - 3. Replace all remaining segments of the lead service line within 30 days*
- 3. Pending policy decision on funding of private side replacement.

*Or 120 days in the event of weather or other circumstances beyond reasonable control. If complete repair of a LSL cannot be completed due to denial by the property owner, the CWS shall request the property owner to sign a waiver from IDPH.

WATERMAIN

In the event of a watermain break/repair, there is currently no requirement to replace lead service lines unless they are somehow physically disturbed. However, if a new lead service line is discovered during the event of excavation, the CWS is required to notify the homeowner of the existence of the lead service line.

Itasca/Branch Office | 555 Pierce Road, Suite 105, Itasca, IL 60143
(630) 466-6700

SCENARIO 2: PLANNED WM REPLACEMENT

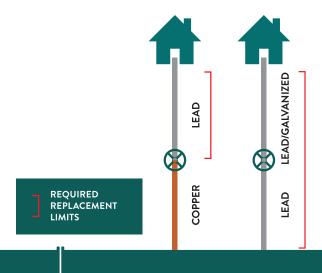

STEPS:

- CWS contacts the building owner 45 days before planned replacement to request access to the building and permission to replace the LSL.
 - If building owner refuses full LSLR, they sign IDPH waiver and CWS notifies IDPH of refusal and remaining lead. Providing filters become the building owner's responsibility.
- 2. CWS completes the planned LSLR.
- 3. Pending policy decision on funding of private side replacement*.
- * See Scenario 4 for policy regarding projects receiving federal or state funding.

WATERMAIN

SCENARIO 3: CUSTOMER-INITIATED LSLR

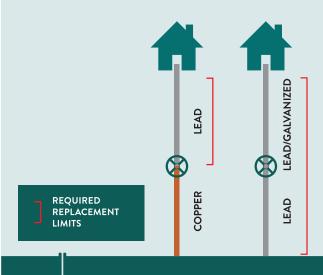

STEPS:

- Building owner provides CWS with at least 45 days' notice before commencing work.
- 2. CWS replaces public side lead within 30 days after completion of private side.
- 3. Pending policy decision on funding of public and/or private side replacement.

Filter requirements: Building owner is responsible for providing filters during a customer-initiated LSLR.

WATERMAIN

SCENARIO 4: FEDERALLY OR IEPA FUNDED LSLR

A CWS receiving federal or IEPA state revolving loan program funding or grant funds under the Illinois Lead Service Line Replacement Fund shall bear the entire expense of full lead service line replacement for all lead service lines in the scope of the loan or grant.

LSLR Steps should follow Scenario 2: Planned Watermain Replacement.
