

WATER SERVICE LINE MATERIAL INVENTORY

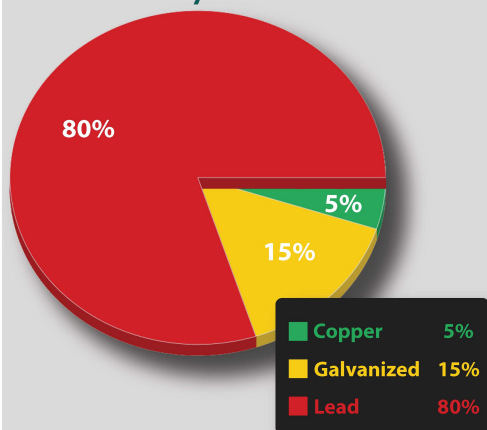

HOME ASSESSMENT

Home Assessment surveys are a great tool for gathering detailed home data and creating a database for lead service line inventories and replacement design and construction.

A DETAILED SURVEY CUSTOMIZED FOR DESIGN AND CONSTRUCTION

The survey is geared towards municipal/consulting staff who will collect detailed data in a home where lead service line replacement is expected to take place. Similar to the resident survey, these surveys can be customized to meet each community's needs and plans. Here are some common details captured by the survey:

INTERIOR ASSESSMENT

- Confirm Service Line Material
- Service Line Size
- Determine Need to Relocate Meter
- Foundation Type
- Asbestos Potential
- Potential Restoration Items
- Photos (with Resident Consent)

EXTERIOR ASSESSMENT

- Potential Obstructions
- Sanitary Cleanout Location
- Exterior Service Line Measurements
- Corp Stop and B-Box Location
- Tree Removal, Landscaping, Restoration, Etc.
- Photos
